

LPFM broadcasting would adversely affect some of our radio stations, including Air 1 at 90.1FM in Yucaipa. Air 1 helps me start out on the right foot. It's a ministry to myself as well as our community. This station has helped many people who were in desperate situations by letting them know there are options out there and people who care about them. Please don't override these stations! They are a lifeline for many people. We have lost so many good things in the world already, please don't make Air 1 one of them!!
